

Mouse mAb to BPV-1 E2 Tag (clone 3F12)

Catalogue #	A1-101-100
Immunogen:	BPV type 1 E2
Immunogen Description:	Recombinant full length BPV type 1 E2 protein purified from <i>E. coli</i>
Uniprot ID:	P03122
Clonality:	Mouse monoclonal
Clone:	3F12
Class:	IgG
Reactivity:	Bovine, BPV type 1 E2 protein, mapped to amino acids 197-208(GVSSTSSDFRDR)
Application:	ELISA, WB, IF
Protocol:	Monoclonal antibody working titer has to be established practically for each particular antigen and assay format.
ELISA:	0.05 µg/ml
IF:	1 µg/ml
Purification:	Protein A purification
Buffer:	PBS with 50% glycerol
Related Products:	9 different monoclonal antibodies to BPV type 1 E2 protein. For more information and ordering see full list: www.icosagen.com/products/?antibodies
Shipping:	This product is shipped in non-frozen liquid form in ambient conditions
Storage:	Store at -20 or -70 °C upon receipt. Divide antibody into aliquots prior usage. Avoid multiple freeze-thaw cycles as product degradation may result.
Background:	E2 protein plays a central role in the viral life cycle as it regulates both transcription and

replication of the viral genome. Can either activate or repress transcription. The E1-E2 protein complex binds to the origin of DNA replication activating replication of the BPV

Figure 2. Immunofluorescence testing of anti-BPV E2 monoclonal antibody (3F12). Assay was carried out with U2OS cells expressing BPV E2 protein. Antibody concentration of 1 $\mu\text{g}/\text{ml}$ was used. Nuclei were stained by DAPI. Fluorescence was measured at (A) 460 nm and 488 nm wavelengths or (B) 488 nm only.
