

Mouse mAb to human MANF (clone 1G12)

Catalogue #	311-100
Immunogen:	Human MANF
Immunogen Description:	Recombinant human MANF protein produced using CHO-based Icosagen Cell factory Ltd. proprietary suspension cell line. Immunogen is purified from cell culture supernatant
Alternative Names:	ARMET, ARP
Uniprot ID:	P55145
Clonality:	Mouse monoclonal
Clone:	1G12
Class:	mIgG1
Reactivity:	Human MANF
Application:	ELISA, WB, IF, IHC-C
Protocol:	Monoclonal antibody working titer has to be established practically for each particular antigen and assay format
ELISA:	0,1-0,2 µg/ml
IF:	1-10 µg/ml
IHC-C:	5 µg/ml
Purification:	Protein G purification
Buffer:	PBS pH 7.4, with 0.1% sodium azide
Shipping:	This product is shipped in non-frozen liquid form in ambient conditions
Storage:	Store at -20°C to -70°C upon receipt. Divide antibody into aliquots prior usage. Avoid multiple freeze-thaw cycles
Background:	MANF is a trophic factor for midbrain dopamine neurons in vivo. It prevents the 6-OHDA- induced degeneration of dopamine neurons in rodent

models of Parkinson's disease (Lindholm et al., 2008, Voutilainen et al., 2009). When administered after 6-OHDA-lesioning it restores the dopaminergic function and prevents degeneration of dopamine neurons in substantia nigra pars compacta
